

SERVICE PROVIDER MESSAGING

A multi-tenant messaging solution for SPs looking to host hundreds to millions of business-level email users, based on a powerful mail server for ISP

With a minimum investment, you can replace your old email server infrastructure – commercial or based on several open source solutions – with Axigen's all-in-one solid SP solution, that is easy to learn, operate and maintain, and offers a clear roadmap evolution to guarantee further inclusion of features.

Key value drivers:

- Speed-of-light messaging
- Optimized hardware usage (save up to 50%)
- Flexible, pay-as-you-grow licensing model
- Features activation according to supplied pack
- Multiple, branding & advertising options
- Seamless integration with 3rd party applications

Powerful Technology

Replace your old email server infrastructure with a single, solid solution

Robust architecture & performance

Axigen's carrier-class mail server is specifically built to provide you with fast and reliable messaging services, leveraging on unique technologies such as Axigen SmartProcessing™ (reduces email processing time to a minimum) and Axigen UltraStorage™ (ensures an effective space management, preventing service downtime or loss of data even at highest traffic peaks).

Multi-tenant infrastructure

Serve multiple customers from a single Axigen instance and achieve significant performance, scalability and cost benefits based on our solution's advanced capabilities, including:

- Account classes, delegated administration
- High availability, clustering support
- Expandable storage, reporting and monitoring module

Effortless Administration

Enjoy simple, time-saving administration for all users from a single platform

Web administration console & CLI

Configure service specific parameters through Axigen's comprehensive Web Administration interface designed for optimized navigability, with quick links and contextual help. Alternatively, automate administrative and provisioning tasks using the Command Line Interface.

Backup & archiving

Get full / partial restores, offline and online backups, or access from more than one location via the Back-up and Restore module. Meet regulatory compliance requirements of major international standards through integration with third-party archiving applications.

Additional Revenue with Value Added Services

Remain competitive against Hosted Exchange, Google Apps or Yahoo Mail

Calendaring & collaboration

Provide your users with efficient time-management tools such as calendars, tasks and notes via an easy-to-use Personal Organizer available from WebMail, MS Outlook and iCal (Webcal) compatible clients. Allow them to share email folders and contacts, access dedicated public folders, and book company resources, all with the Groupware add-on (including Outlook Connector).

Wireless mobile sync

Offer your users access to relevant data anytime, anywhere, by synchronizing email messages, contacts, calendars or tasks with Axigen's built-in Exchange ActiveSync® support for mobile devices (Nokia, iPhone, Windows Mobile devices etc) or via the AstraSync™ or the NotifySync™ client (for BlackBerry® smartphones).

Fast installation and configuration, a very efficient Webadmin and a plethora of settings that can be tweaked are some of Axigen's strong points. Add those to stability, almost unbeatable security and great overall performance and you get this high-class mail server solution.

Softpedia.com

Local & Remote Access

Grant access to customers locally, from various POP3 / IMAP email clients such as MS Outlook, Mozilla Thunderbird or Apple Mail. Alternatively, Axigen's WebMail interfaces (Ajax / standard / mobile) seamlessly approach the desktop experience even when accessing email remotely.

Extensive Security Toolset

The Axigen messaging platform guarantees secure reception, transit and delivery of email. Protect your confidential data with an extensive set of defensive tools, such as: authentication and encryption, anti-impersonation policies, SPF and DomainKeys compliance, blacklisting / whitelisting / greylisting, country filtering, and many more.

For extra email protection, you can extend Axigen's standard ClamAV and SpamAssassin defensive tools by integrating any of the available commercial AntiVirus / AntiSpam apps. Further, get premium defense via the Kaspersky AntiVirus / Kaspersky AntiSpam (embedded) and Commtouch Real Time AntiSpam Protection add-ons.

Large Scale Solutions

Axigen relies on its carrier-class technology to sustain complex setups and provide the required level of service availability and seamless scalability: clustered setups (front-end / back-end), SMTP / IMAP / POP3 / WebMail proxies.

Ask for Evaluation

All the Axigen product kits can be downloaded as evaluation versions for 30 days, with:

- All features enabled
- Unlimited users
- Unlimited domains
- FIRsT Support included

axigen.com/download

Virtually unlimited users

Increase your service and customer base with maximum results:

- Pay only for the premium users in the SP solution license
- Get an impressive number of free, basic email users included in the SP solution
- Scale up to millions of users (Axigen can support a virtually unlimited number of mailboxes and domains)

24x7 technical support

Benefit from our FIRsT line of support totally free of charge during trial and first year of use:

- Human response time within an average of 2 hours, by email
- Support in local language by local partners
- Assistance for: installation, migration, configuration, troubleshooting etc
- Multiple additional online resources
- Includes software maintenance (new version upgrades, patches or updates)

World-class professional services

Our Professional Services team can offer you comprehensive Axigen training and assistance during the entire project.
